Re: Ground Water Permit No. G3-29338

In response to your request, you are hereby granted an extension to put the water to full beneficial use for the reason(s) below:

According to your request, you will need additional time to monitor the existing wells for reliability and capacity. Ongoing litigation has delayed the project from being completed and will hinder completion in the near future. In review of your request for extension, it appears you have made significant progress in putting the water to beneficial use. The time requested is excessive considering the size of the project and will be reduced to a more reasonable period of time. We will grant you an additional three years to complete your project and put water to full beneficial use. If additional time is required beyond this extension, your project will be reevaluated at that time.

The new deadline to submit your *Proof of Appropriation of Water* is **January 1, 2016**.
